

MISSION

Since its foundation, Grupotec, a multidisciplinary engineering and architecture company leading in the photovoltaic energy sector, has been committed to protecting the environment and promoting sustainable development.

Grupotec wants to contribute to, and help overcome some of the biggest challenges faced by society, through engineering and the use of clean energy production to create a more sustainable world.

GRUPOTEC has always seen quality, the environment, health and safety, as well as information security as a priority and a fundamental part of the management in the organization. Therefore, our activity is developed following an Integrated Management System, according to international standards ISO 9001, 14001, 45001, 27001 y 19650-2.

Grupotec's ethos is to contribute and help society through the use of sustainable development. Our aim is to provide

VIEW

excellent quality in our products and services through the use of technological solutions, robustness and integrity of the information we handle, with a clear focus on making all our actions sustainable at an international level.

The main features that characterise our work are:

- To achieve our clients' full satisfaction, meeting their expectations and fulfilling their requests.
- To operate in an environmentally sustainable manner, minimizing our environmental footprint, through the prevention of pollution in our operations, the correct management of our resources and the promotion of clean energies.
- Prevention of occupational risks that might result from the development of our activity, for our employees, partners and outside staff who could be affected.
- To participate in the digital transformation of the design and construction sector.
- To organize, digitise and protect the information processes likely to do so, to streamline work.
- Always develop our activities with reference to a permanent system of continuous improvement.

VALUES

For GRUPOTEC, the success of the Organization is based on the success of the professionals that compose it. For this reason, we are entirely convinced that Grupotec's main asset is the quality of each person composing our team.

Honesty, professionalism, proximity, commitment, respect for the environment and innovation are the main values that have enabled us to develop multiple projects on an international scale, expanding as a company day by day, all of which will allow us to confront future challenges and opportunities with greater guarantees of success.

COMMITING

The Management of GRUPOTEC is committed to:

- Establishing Quality, Environmental, Health and Safety, Information security and Information management in BIM projects Standards to ensure compliance with this policy and maintain continuous improvement of our performance.
- Provide the necessary and adequate means and resources for the achievement of these objectives.
- Comply with all applicable requirements in terms of our Integrated Management System, whether they are legal, from customers or other applicable requirements, as well as those that the organization endorses.
- Operate based on the importance of information management in our projects, particularly in those that use BIM methodology and technology.
- Advance in the continuous improvement of the Integrated Management System, raising awareness and training our staff in all subjects involved.
- Provide health and safety standards in the workplace, avoiding risks and encouraging feedback and participation among employees.
- Comply with the established company policy, as well as promote this culture within the organization.
- Preserve the confidentiality, availability and integrity of the information used, as well as the assets that support it, establishing risk assessment criteria and adequately treating the ones which level is unacceptable.
